Vannes, France

Engineering student in software development and cybersecurity – Seeking a 6-month Full Stack Developer internship from 2027

TECHNICAL SKILLS

Java and Back-end : Java 17 (4 years of practice), Spring Boot, Spring MVC, Hibernate, Spring Data JPA, Maven, REST API

Full Stack Development : React.js, TypeScript, JavaScript, HTML5/CSS3, Angular (3 years of practice)

Object-Oriented Programming : OOP, SOLID principles, layered architecture

Databases : PostgreSQL, Oracle, MongoDB, SQL Server, BDD

Quality and Testing : Unit testing (JUnit), testing and validation, SonarQube (SAST), code review, debugging

DevOps and Tools : Git, GitLab CI/CD, Jenkins, Docker, Terraform, Azure

Application Security : JWT, OAuth2, OWASP Top 10, OWASP ASVS, GDPR

Methods and Soft Skills : Agile Scrum, teamwork, communication, ability to build relationships, adaptability

Languages : Arabic (native), French (fluent), English (fluent)

PROFESSIONAL EXPERIENCE

Project Lead and Java Backend Developer – E-SCOLIS

09/2025 – 01/2026

Team project – ENSIBS

Vannes, France

- Developed two Java Spring Boot microservices (Notification API, Email Sender API, JWT): about ten REST endpoints, testing and validation on 1,000 email requests (200 to 500 ms).
- Project lead: coordination, task assignment, teamwork and communication with the team (Agile Scrum).
- GDPR/OWASP ASVS audit: 9 vulnerabilities identified, debugged and fixed.

AI Intern and Full Stack Developer

06/2025 – 08/2025

AGA DISPA SERVICE

Agadir, Morocco

- Technical needs analysis and design of a multi-agent RAG AI chatbot (Python/FastAPI, LangGraph, 4 agents, 30 documents), integrated into a Laravel frontend.
- Groq API integration, performance optimization; Agile Scrum (Jira, user stories).

Web Developer Intern

06/2024 – 09/2024

Elaouad Architecture & Engineering (EAE)

Casablanca, Morocco

- Management web application (clients, offers, payments): React.js front end, Laravel back end with 15 API endpoints and a 7-table database.

PROJECTS

Banking API | Java 17, Spring Boot, Spring Security, Angular

04/2025 – 05/2025

- Secure REST API (OAuth2/JWT) with 10 endpoints: clients, accounts and banking operations; layered architecture, Spring Data JPA, JUnit tests (70 % coverage).

Event Management Platform | Spring Boot, Thymeleaf, Docker

10/2025 – 02/2026

- Full stack application: Docker deployment, role-based authentication, online payments (PayPal), notifications.

EDUCATION

École Nationale Supérieure d'Ingénieurs de Bretagne Sud (ENSIBS)

2025 – Present

Engineering Degree – Software Cybersecurity (5 years, Master's equivalent)

Vannes, France

École Normale Supérieure de l'Enseignement Technique (ENSET)

2023 – 2025

Engineering Cycle – Software Engineering (GLSID)

Mohammedia, Morocco

Moulay Ismail University

2020 – 2023

Bachelor's Degree in Software Engineering

Meknès, Morocco
